This is a work of fiction. The story, the places, the events and the organizations in it are imaginary and are not connected with any real event, venue, club, team or broadcaster. The names in the suspect register were built from public U.S. Census name lists and paired at random; any resemblance to real people is a coincidence.

The case has been checked by computer: there is exactly one killer, every clue is needed to narrow the register down to the finalists, and the answer is never printed in the book.

WELCOME, DETECTIVE

Thank you for choosing this book. Somewhere in these pages, among 800 names, one person committed a crime, and you are the only detective on the case.

Every clue is fair, a checkpoint after every clue keeps you on track, and the answer is never printed, so nothing can spoil the surprise. Take it one clue at a time. There is no rush.

Happy sleuthing,
the team at Fun Books Publisher

HOW TO PLAY

You are the detective. A crime has been committed at the Magnolia Queen, and the killer is one of the **800 people** in the Suspect Register, which comes right after the clues.

1. Read the case. The story tells you what happened.

2. Take the clues one at a time. Each clue tells you one true fact about the killer, and exactly what to cross out.

3. Go through the whole register and cross out every suspect who does not match the clue. Draw one straight line through the name, so you can still read it later.

4. Check your work. After every clue there is a **checkpoint**. If your numbers match, carry on. If not, look back over that clue before you move on.

5. Part One ends with 3 finalists. In **Part Two** you study the police case files to find out which of them is the killer. Part Two has its own instructions.

6. Check your answer with the Verdict Code at the end of the book.

You will need: a pen or a fine marker, good light, and a cup of something nice. A ruler or a bookmark helps you keep your place on the page.

Take your time. This is not a race. Most detectives solve a few clues a day.

A QUICK PRACTICE CASE

Here is a tiny register with only six suspects, already solved, so you can see how it works before you start the real case.

TICKET	NAME	AGE	CROSSED OUT BY
~~41207~~	~~Ann Lee~~	~~34~~	Clue 1
~~52818~~	~~Bob Hart~~	~~67~~	Clue 3
~~63544~~	~~Ida Moss~~	~~45~~	Clue 2
~~70132~~	~~Tom Reyes~~	~~52~~	Clue 3
~~81936~~	~~Eve Cole~~	~~28~~	Clue 1
90217	Joe Park	71	**THE KILLER**

Clue 1. The killer is 40 years old or older. Cross out Ann (34) and Eve (28).

Clue 2. The killer's ticket number contains the digit 1. Cross out Ida, because her ticket, 63544, has no 1 in it.

Clue 3. The killer's ticket number is odd. Cross out Bob (52818) and Tom (70132). Only Joe Park is left.

That is all there is to it. The real case works exactly the same way, just with a great many more suspects. Good luck, detective.

CASE FILE

DEATH ON THE MAGNOLIA QUEEN

Every summer the Magnolia Queen, the last great paddle steamer on the Mississippi, sails out of Natchez for her famous Saturday night dinner cruise: a jazz band, crab cakes, and eight hundred passengers in their best clothes.

This year was Captain Silas Merrow's last cruise. After forty years at the wheel, he had promised to end the night by opening the ship's old safe in front of everyone, and to tell who had really sold him the "lost" riverboat log that made the Magnolia Queen famous.

At twenty past nine, the first mate found the captain dead in his cabin. He had been struck from behind. The safe was open, and the old log was gone.

Every passenger had a numbered boarding ticket, and the purser's register lists all eight hundred of them: ticket number, name and age. The boat had not touched the shore since it left Natchez. The killer was still on board.

This short bonus case works exactly like the books. In **Part One**, the clues will help you rule out suspects until only three **finalists** are left. In **Part Two**, the purser's files will tell you which of the three did it.

MY NOTES

PART ONE: THE CLUES

EVIDENCE #1

Clue 1 of 10

The killer had a first name stitched onto a souvenir napkin at the embroidery table, and the needle broke halfway through. The half-napkin left in the Captain's Cabin shows only one clear letter of the first name: an E.

The killer's FIRST name contains the letter E.

What to do: Cross out every suspect whose first name has no letter E.

CHECKPOINT. When you have finished this clue, page 19 should have **25** names left and page 28 should have **28**. To check any other page, use the Checking Tables on page 29.

EVIDENCE #2

Clue 2 of 10

Boarding tickets with a 1 in the number were printed on the old machine, which punches a star-shaped hole; all the others got a round hole. A corner of the killer's ticket, too small to show any numbers, was found under the captain's desk. Its hole is round.

The killer's ticket number does not contain the digit 1.

What to do: Cross out every suspect whose ticket number has a 1 anywhere in it.

CHECKPOINT. When you have finished this clue, page 19 should have **15** names left and page 21 should have **18**. To check any other page, use the Checking Tables on page 29.

EVIDENCE #3

Clue 3 of 10

The "Young at Heart" dance contest was open only to passengers aged 55 or younger, and every dancer wore a numbered paper badge. The killer's dance badge was found torn off by the cabin door. The number on it is smudged beyond reading.

The killer is 55 years old or younger.

What to do: Cross out every suspect older than 55.

CHECKPOINT. When you have finished this clue, exactly **123** suspects should be left in the whole register.

EVIDENCE #4

Clue 4 of 10

The gangway scanner could not read tickets with an 8 in the number, so those passengers had their ticket stamped by hand in purple ink. The same corner of the killer's ticket has no purple ink on it.

> **The killer's ticket number does not contain the digit 8.**
>
> **What to do:** Cross out every suspect whose ticket number has an 8 anywhere in it.

CHECKPOINT. When you have finished this clue, exactly **69** suspects should be left in the whole register.

EVIDENCE #5

Clue 5 of 10

The killer signed the captain's guest book for the safe opening. A glass of iced tea was knocked over it, and only one letter of the last name can still be read: an A.

> **The killer's LAST name contains the letter A.**
>
> **What to do:** Cross out every suspect whose last name has no letter A.

CHECKPOINT. When you have finished this clue, exactly **41** suspects should be left in the whole register.

EVIDENCE #6

Clue 6 of 10

The purser stamps a last name on every brass luggage tag, from a box of metal letters that has been missing its S for years; names with an S get a paper tag instead. The killer's luggage tag, left on the captain's chair, is brass, and the name has been scratched off.

> **The killer's LAST name does not contain the letter S.**
>
> **What to do:** Cross out every suspect whose last name contains the letter S.

CHECKPOINT. When you have finished this clue, exactly **26** suspects should be left in the whole register.

EVIDENCE #7

Clue 7 of 10

Passengers with a ticket ending in 0, 1, 2, 3 or 4 boarded through the lower gangway and got a blue wristband; everyone else boarded through the upper gangway and got a yellow one. A snapped blue wristband was found by the open safe, torn off the killer's wrist in a hurry.

> **The LAST digit of the killer's ticket is 0, 1, 2, 3 or 4.**
>
> **What to do:** Cross out every suspect whose ticket ends in 5, 6, 7, 8 or 9.

CHECKPOINT. When you have finished this clue, exactly **12** suspects should be left in the whole register.

EVIDENCE #8

Clue 8 of 10

The purser's seating cards have six printed boxes for a last name, and longer names run along the bottom edge. The killer's seating card was found in the cabin, smudged by the rain, but there is nothing written along the bottom edge.

The killer's LAST name has 6 letters or fewer.

What to do: Cross out every suspect whose last name has more than 6 letters.

CHECKPOINT. When you have finished this clue, exactly **8** suspects should be left in the whole register.

EVIDENCE #9

Clue 9 of 10

The bar prints each guest's first name on a cocktail stirrer, and the printer had no letter O all night, so any name with an O got a plain stirrer. The killer's stirrer, left in the captain's glass, is printed, although the river damp has washed the letters away.

The killer's FIRST name does not contain the letter O.

What to do: Cross out every suspect whose first name contains the letter O.

CHECKPOINT. When you have finished this clue, exactly **5** suspects should be left in the whole register.

EVIDENCE #10

Clue 10 of 10

A scrap of the killer's ticket was caught in the hinge of the safe door. Only one digit survives on it: a 7.

The killer's ticket number contains the digit 7.

What to do: Cross out every suspect whose ticket number has no 7 in it.

CHECKPOINT. When you have finished this clue, exactly **3** suspects should be left in the whole register. These are your **finalists**. Write their names and ticket numbers in the box on page 30, then turn to Part Two.

CHECKING TABLES

How many names should be left on each register page after each clue. Find your page in the first column. The tables stop at Clue 2. After that, so few names are left that a table would point straight at the finalists; the checkpoints give the total for the whole register instead.

PART TWO: THE CASE FILES

Well done, detective. Three finalists are left, and every one of them matches every clue. Now find out which of them killed Captain Silas Merrow.

The purser's staff copied the records in a hurry and wrote down only the **last three digits** of each ticket, never names. So first write down your three finalists and their full ticket numbers in the box below. Many other numbers appear in the files: they belong to people you crossed out in Part One, so you can ignore them. When a record's three digits match one of your finalists, it belongs to that finalist: the police have already checked.

The passenger records are **not complete**, so a finalist who is missing from them has done nothing wrong. What counts is a record that puts a finalist somewhere else at the wrong time. The last two files, for the paperweights and for the key cards, are complete lists.

The killer must pass all **three tests** on the next page. Each of the other finalists fails at least one.

THE THREE TESTS

TEST 1: OPPORTUNITY

The captain was attacked in his cabin at some moment between **9:05 and 9:15 PM**. The killer had to be in the Captain's Cabin at that time.

How to check it: Look up the last three digits of each finalist's ticket in the passenger records (Files A to G). If a finalist was seen somewhere else at a time that makes it **impossible** to reach the Captain's Cabin between 9:05 and 9:15, using the walking times on the map, that finalist fails this test. Walking times are the same in both directions.

Example: someone seen in the Library at 9:10 PM could not have been in the Captain's Cabin at any moment between 9:05 and 9:15: the Library is 8 minutes' walk away.

And the other way around: someone seen on the Promenade Deck at 9:30 PM could easily have been in the Captain's Cabin at 9:10, because the deck is only 5 minutes away.

TEST 2: MEANS

The captain was struck with a **brass anchor paperweight**, sold that night only at the Purser's Shop. The killer bought one.

How to check it: Look for the last three digits of each finalist's ticket in the shop's sales book (File H). A finalist who is not in it fails this test.

TEST 3: ACCESS

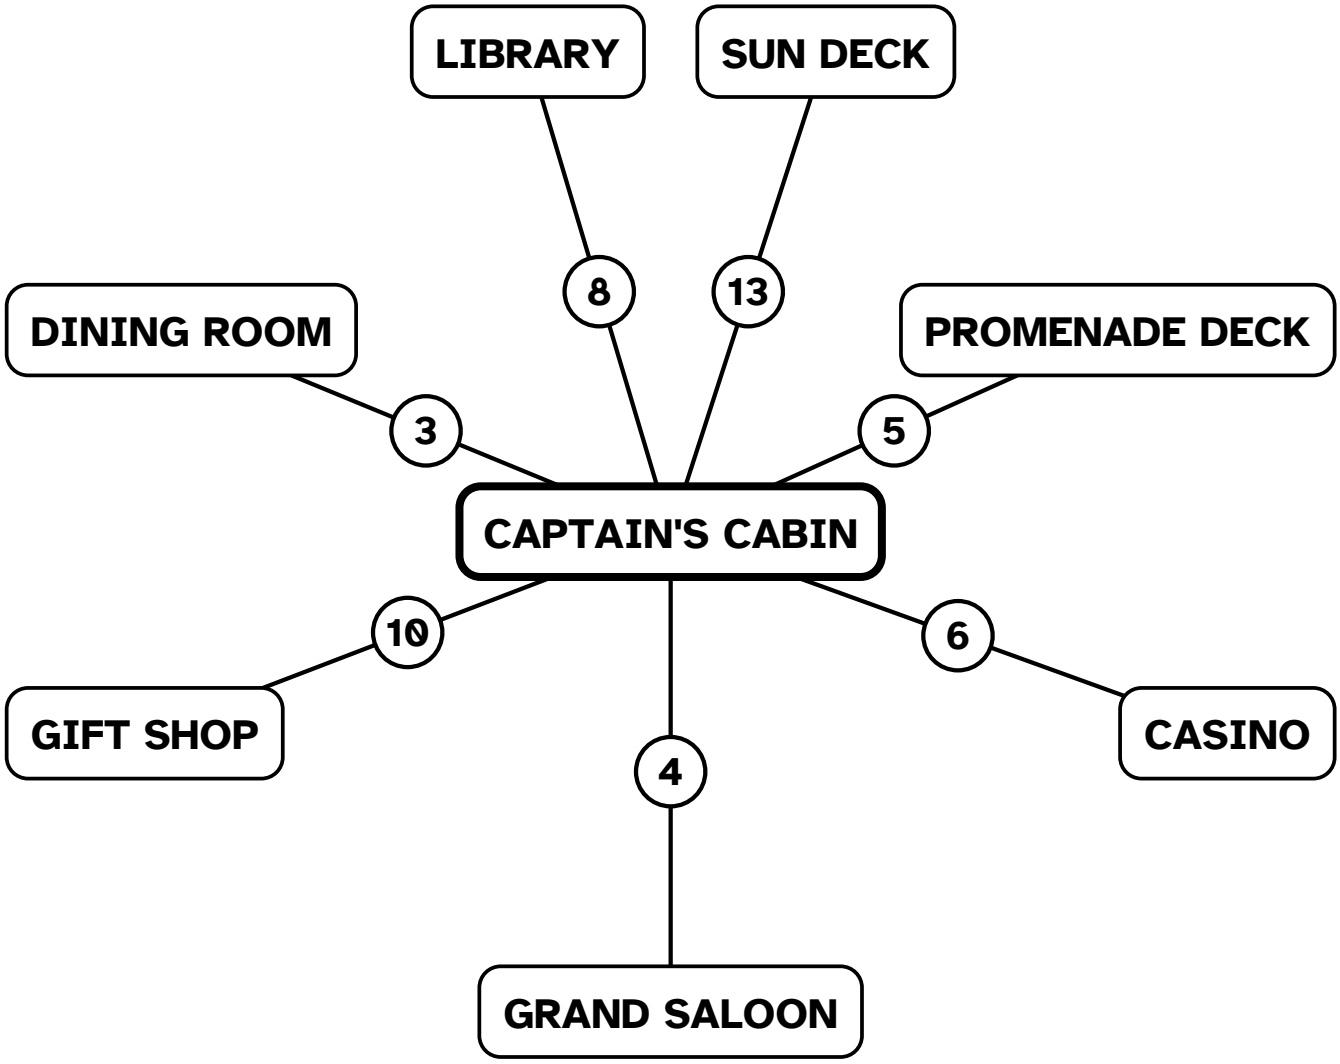

The corridor to the Captain's Cabin has a locked door, and only a red **Captain's Table key card** opens it. The killer had one.

How to check it: Look for the last three digits of each finalist's ticket in the list of red key cards (File I). A finalist who is not on it fails this test.

Stuck? There are gentle hints for every test on page 39.

THE DEDUCTION SHEET

Write each finalist's ticket number, then put a check mark if they pass the test and an X if they fail it. The killer is the only one with three check marks.

TICKET	TEST 1 Opportunity	TEST 2 Means	TEST 3 Access
_____	☐	☐	☐
_____	☐	☐	☐
_____	☐	☐	☐

The killer is ticket number _____

Now work out your Verdict Code on page 42 to check your answer.

HINTS, PART A: A GENTLE NUDGE

Read these first. Each one tells you where to look, not what you will find.

TEST 1: OPPORTUNITY

Hint 1-A. Work with one finalist at a time. Find every record with the last three digits of their ticket in the records (Files A to G), and note the place and the time.

TEST 2: MEANS

Hint 2-A. Look for the last three digits of each finalist's ticket in File H. The list is in number order.

TEST 3: ACCESS

Hint 3-A. Look for the last three digits of each finalist's ticket in File I. The list is in number order.

HINTS, PART B: A STRONGER PUSH

Each hint tells you how many of your finalists fail that test.

TEST 1: OPPORTUNITY

Hint 1-B. Exactly 1 of your finalists fails this test.

TEST 2: MEANS

Hint 2-B. Exactly 1 of your finalists fails this test.

TEST 3: ACCESS

Hint 3-B. Exactly 1 of your finalists fails this test.

HINTS, PART C: THE ANSWERS

Only read this page if you are truly stuck. It explains which finalists fail each test, and why.

TEST 1: OPPORTUNITY

Hint 1-C. The finalist whose ticket ends in 472 was on the Sun Deck at 9:08 PM. The quickest walk from the Sun Deck to the Captain's Cabin takes 13 minutes, so they could not have been there at any moment between 9:05 PM and 9:15 PM.

TEST 2: MEANS

Hint 2-C. The finalist whose ticket ends in 370 is not in File H.

TEST 3: ACCESS

Hint 3-C. The finalist whose ticket ends in 472 is not in File I.

YOUR VERDICT CODE

When only one suspect is left, work out their **Verdict Code**. It is the only way to check your answer: the solution is never printed as a name anywhere in this book.

Step 1. Give every letter of the suspect's first and last name its number from the table below, and add them all up.

Step 2. Add the **last three digits** of the suspect's ticket number.

Step 3. Look up the total in the Verdict Table on the next page.

A	**B**	**C**	**D**	**E**	**F**	**G**	**H**	**I**	**J**	**K**	**L**	**M**
1	2	3	4	5	6	7	8	9	10	11	12	13
N	**O**	**P**	**Q**	**R**	**S**	**T**	**U**	**V**	**W**	**X**	**Y**	**Z**
14	15	16	17	18	19	20	21	22	23	24	25	26

Example (not a real suspect): **Ada Bell**, ticket **31207**.

Ada = A 1 + D 4 + A 1 = 6. Bell = B 2 + E 5 + L 12 + L 12 = 31. Name total = 6 + 31 = 37.

Last three digits of the ticket: 207. Verdict Code = 37 + 207 = **244**.

STOP, DETECTIVE

Do not turn the page until the Verdict Table says **CASE CLOSED**.
The end of the story is on the other side.

CASE CLOSED

The old log turned up the next morning, wrapped in oilcloth inside a life ring locker at the stern, with the captain's notes folded between its pages.

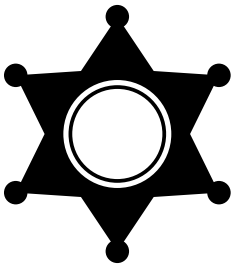

The notes explained everything. The "lost" log that had made the Magnolia Queen famous was a clever fake, and the captain had finally proved it. The person who had sold it to him years ago was on board that night, and was not going to let the truth come out in front of eight hundred passengers.

The Magnolia Queen still sails out of Natchez every Saturday night. The captain's wheel hangs in the Grand Saloon now, with a small brass plate underneath: "Forty years, and an honest log."

Eight hundred passengers, ten clues, three tests and one pen. You found the one person who could have done it.

Case closed. Well done, detective.
